Education

JECRC University, Jaipur August 2023 – July 2027
Bachelor of Technology in Computer Science & Engineering **CGPA: 8.6**
Relevant Coursework: Data Structures & Algorithms, Operating Systems, OOP, Computer Networking, DBMS, Artificial Intelligence, Machine Learning, Google Cloud Computing

Varda Smart School, Sikar 2021–2022
Senior Secondary (Class XII) **Percentage: 70.6%**

Varda Smart School, Sikar 2019–2020
Secondary (Class X) **Percentage: 74.8%**

Projects

AirX Drive — Scalable Cloud File Storage Platform **GitHub Repo**

- Architected a Google Drive-inspired cloud storage system using **Spring Boot** and **Microservices Architecture**, decomposing into independent services with **Netflix Eureka** for dynamic service discovery.
- Built **React.js** frontend integrated via **RESTful APIs** with **API Gateway** for secure request routing and orchestration.
- Engineered backend services using **JPA** and **H2 Database**, implementing **Load Balancing** and **Circuit Breaker** resilience patterns to ensure high availability, fault tolerance and reliable execution across distributed services.

MyCineVerse — Movie Ticket Booking Platform **GitHub Repo**

- Architected a BookMyShow-inspired ticket booking platform using **Spring Boot** and **RESTful APIs**, enabling movie browsing, show scheduling and ticket booking.
- Developed a dynamic frontend using **HTML, CSS, and JavaScript**, integrating with backend via APIs, and implemented efficient **Schema Design** with **JPA** mappings on **MySQL** for structured and optimized data management.
- Engineered scalable backend using **Maven** with layered architecture for reliable data persistence.

CodeNest — Coding Contest Management Platform **GitHub Repo**

- Built a full-stack contest management platform using **Java, Servlets, and JSP**, enabling institutions to create, schedule, and manage coding contests through a modular and scalable system design.
- Built role-based **Admin and User Panel** enabling contest creation, scheduling and participant registration.
- Managed backend data operations using **JDBC and MySQL** with optimized **Schema Design** and responsive interfaces using HTML, CSS, JavaScript.

Experience

Web Development Intern — Corizo | Remote June 2024 – August 2024

- Developed full-stack web applications using **MERN Stack**, contributing to two team projects covering frontend, backend, and database integration.
- Designed **MongoDB** schemas and implemented efficient queries for fast data storage and retrieval.

Achievements

- Achieved **1850+ rating** in LeetCode weekly contests, ranking in the **top 6.34%**, and secured **645 global rank** in Biweekly Contest 182.
- Attained a **1600+ rating** in CodeChef weekly competitions and received **global rank 82** in Starters 148.
- **1st Place** in Code-O-Mania and **2nd Place** in Code-A-thon, Competitive Coding contests at JECRC University Tech Fest.
- Solved **1500+ DSA problems** across LeetCode, CodeChef, GFG and Codeforces.
- Cleared **Level 1** and advanced to **Level 2** of Deloitte's **GenW.AI** Explorer coding competition.

Technical Skills

- **Languages:** C, C++, Java, Python, JavaScript
- **Backend:** Spring Boot, Spring Framework, Microservices, REST APIs, Servlets, JSP, MVC, Netflix Eureka, API Gateway, Load Balancing, Circuit Breaker, Spring Security, JWT, JPA, JDBC
- **Frontend:** React.js, HTML5, CSS3, Tailwind CSS
- **Database:** MySQL, MongoDB, PostgreSQL, Schema Design
- **System Design:** High-Level Design (HLD), Low-Level Design (LLD)
- **DevOps & Tools:** Docker, Git, GitHub, Postman, Maven, Antigravity
- **Soft Skills:** Problem Solving, Leadership, Team Collaboration, Communication, Time Management, Quick Learner

Certifications

- **JavaScript (Intermediate)** — HackerRank | **Problem Solving (Intermediate)** — HackerRank
- **Google Cloud Computing Fundamentals** — Google (Verified on Credly) | **Dynamic Programming** — CodeChef
- **GenW.AI Explorer (Level 1)** — Deloitte
